

# RACKETS

## VICTOR

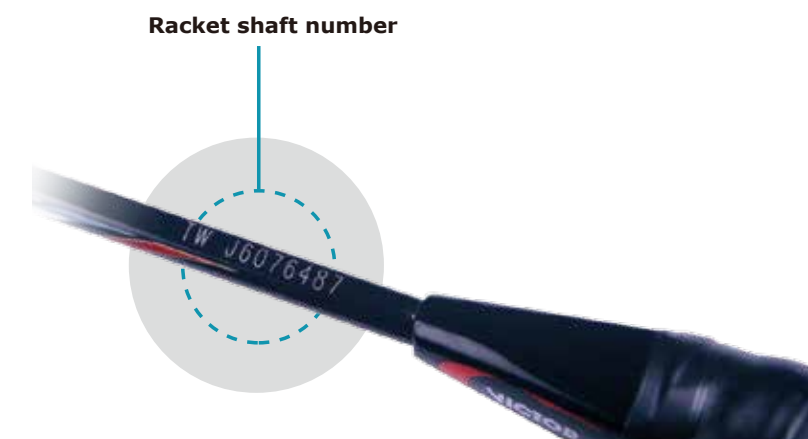

## Your VICTOR, Your RACKETS

VICTOR not only makes every effort in the area of product material R&D, technology and quality, it also attaches importance to the rights of the consumers. From 2011 all rackets have a specification laser code or specification sticker providing detailed racket specification information.

## Racket Shaft Number

Each VICTOR racket has its own personal shaft number, shown at the bottom of the shaft, which is the exclusive ID of each individual racket. The first Roman letters show the sales area (TW is Taiwan and CN is China). To avoid buying a product that is a parallel import or counterfeit, affecting your warranty rights, please check this number carefully.

**Laser Engraved Code & Hologram Sticker**

**OLD Display**

- A** Weight : 3U  
**B** Grip : G5  
**C** Tension : H≤30lbs V≤28lbs  
**D** Balance : HH●○○○HL  
**E** Stiffness : S●○○○F

**NEW** Display (From 2014)

### A. Weight

"U" is the unit of weight.  
2U stands for 90-94.9 grams  
3U stands for 85-89.9 grams  
4U stands for 80-84.9 grams  
5U stands for 75-79.9 grams  
(all are unstrung weight)

## B.Grip

VICTOR releases new grip indicator in 2013, provides consumers an easier way to select the racket that best suits their needs.

2013 New Indicator	G6	G5	G4
Original Indicator	G1	G2	G3
Grip Size	7.9cm	8.1cm	8.5cm

("G" is unit of grip perimeter.)

### C.Tension

Tension, divided into lateral line H and vertical line V tension, is the safety factor of a racket frame, the maximum poundage that can be safely reached when a racket is strung. For example,  $H \leq 30 \text{ lb}$   $V \leq 28 \text{ lb}$  means that, when a racket is strung, the highest lateral line tension is 30 lb and the highest vertical line tension is 28 lb.

### D.Balance

The racket balance point is the distance from the front sleeve to the fulcrum, the higher the value the heavier the head is (HH), and the smaller the value the lighter the head (HL).

### E. Stiffness

The stiffness of the shaft affects the feeling when you play badminton. When a soft racket (shaft) is used, the shuttlecock stays on the racket face for a longer time and is easier to control. Soft rackets are suited for use by beginners. When a stiff racket hits a shuttlecock, accuracy and efficiency of power delivery are better than with a soft racket; stiff rackets are best used only by advanced players.

## F.Response

The Response Indicator is classified into 10 levels which shows on the racket's shaft. The dot closes left side with stiff response, while right side with flexible response.

### G.Hologram Sticker

All VICTOR products have a hologram sticker. To protect your interests as a consumer, please check this sticker to ensure you buy a genuine VICTOR product.

Shift the label lightly  
under single or multiple  
sources of light.

	Stiff Response	Flexible Responses
Racket Structure	Rigid	Ductile
Features	Provide stiff feel and efficiently transfer the power to shuttlecock.	Provide smooth experience and contribute to less energy require to be used.
Players	Players who enjoy an aggressive game.	Players who enjoy effortless power.

### Rackets Hologram Sticker

## Other Products

## VICTOR 3 TYPES OF RACKETS

VICTOR has released three ways to classify the racket. ALL-AROUND, SPEED and POWER. Together with the racket cross-coordinate map (HEAVY, LIGHT, POWER and CONTROL), player can precisely select the racket that best suits their needs according to playing style, habits and requirements.

**PRECISION, CONTROL THE SITUATION AUTHORITATIVELY.**

This stable and solid ALL-AROUND racket type gives excellent handling and is suitable for player seek for precision and control.

**Series of Represent: HYPERNANO X / METEOR X**

### **HYPERNANO X**

HYPERNANO X enables maximal accuracy in smashes and offers great control that allows easy shifting between defense to attack. Powered by AERO-DIAMOND and advanced material technology, HYPERNANO X efficiently attacks and defends with best functionality, at the same time keeping balance and stabilizing anti-torque.

### **METEOR X**

Improved reinforced hitting power and racket frame stability. The METEOR X series uses the OCTABLADE structure combined with CARBON XT reinforced woven carbon fiber technology to not only provide racket frame stability, but also improve effectiveness in reducing air resistance, attacking power, and added antitorque in the shaft. Strung with the EIGHTY-80 mode and the PEAK WAVES to provides greater frame stability and not only increases the fit of the strings, but also reduces wear and tear for better racket durability.

**SPEED IS THE FIRST STEP TO VICTORY.**

The SPEED type racket is light and can facilitate faster swing, allowing key opportunities to be grasped. This racket type is suitable for players who seek and rely on speed.

**Series of Represent: JETSPED S / BRAVE SWORD**

### **JETSPED S**

Equipped with innovative frame structure and technology, offer fast and smooth swing and incredible response with instant strength. This series offer the player with a great advantage over opponents during the game.

### **BRAVE SWORD**

The BRAVE SWORD uses diamond-shaped design to cut wind as a sword, vastly reducing air resistance while encouraging nimble handling. The INNER WAVES technology provides more consistent face stability.

**DELIVER LETHAL SMASHES TO WIN.**

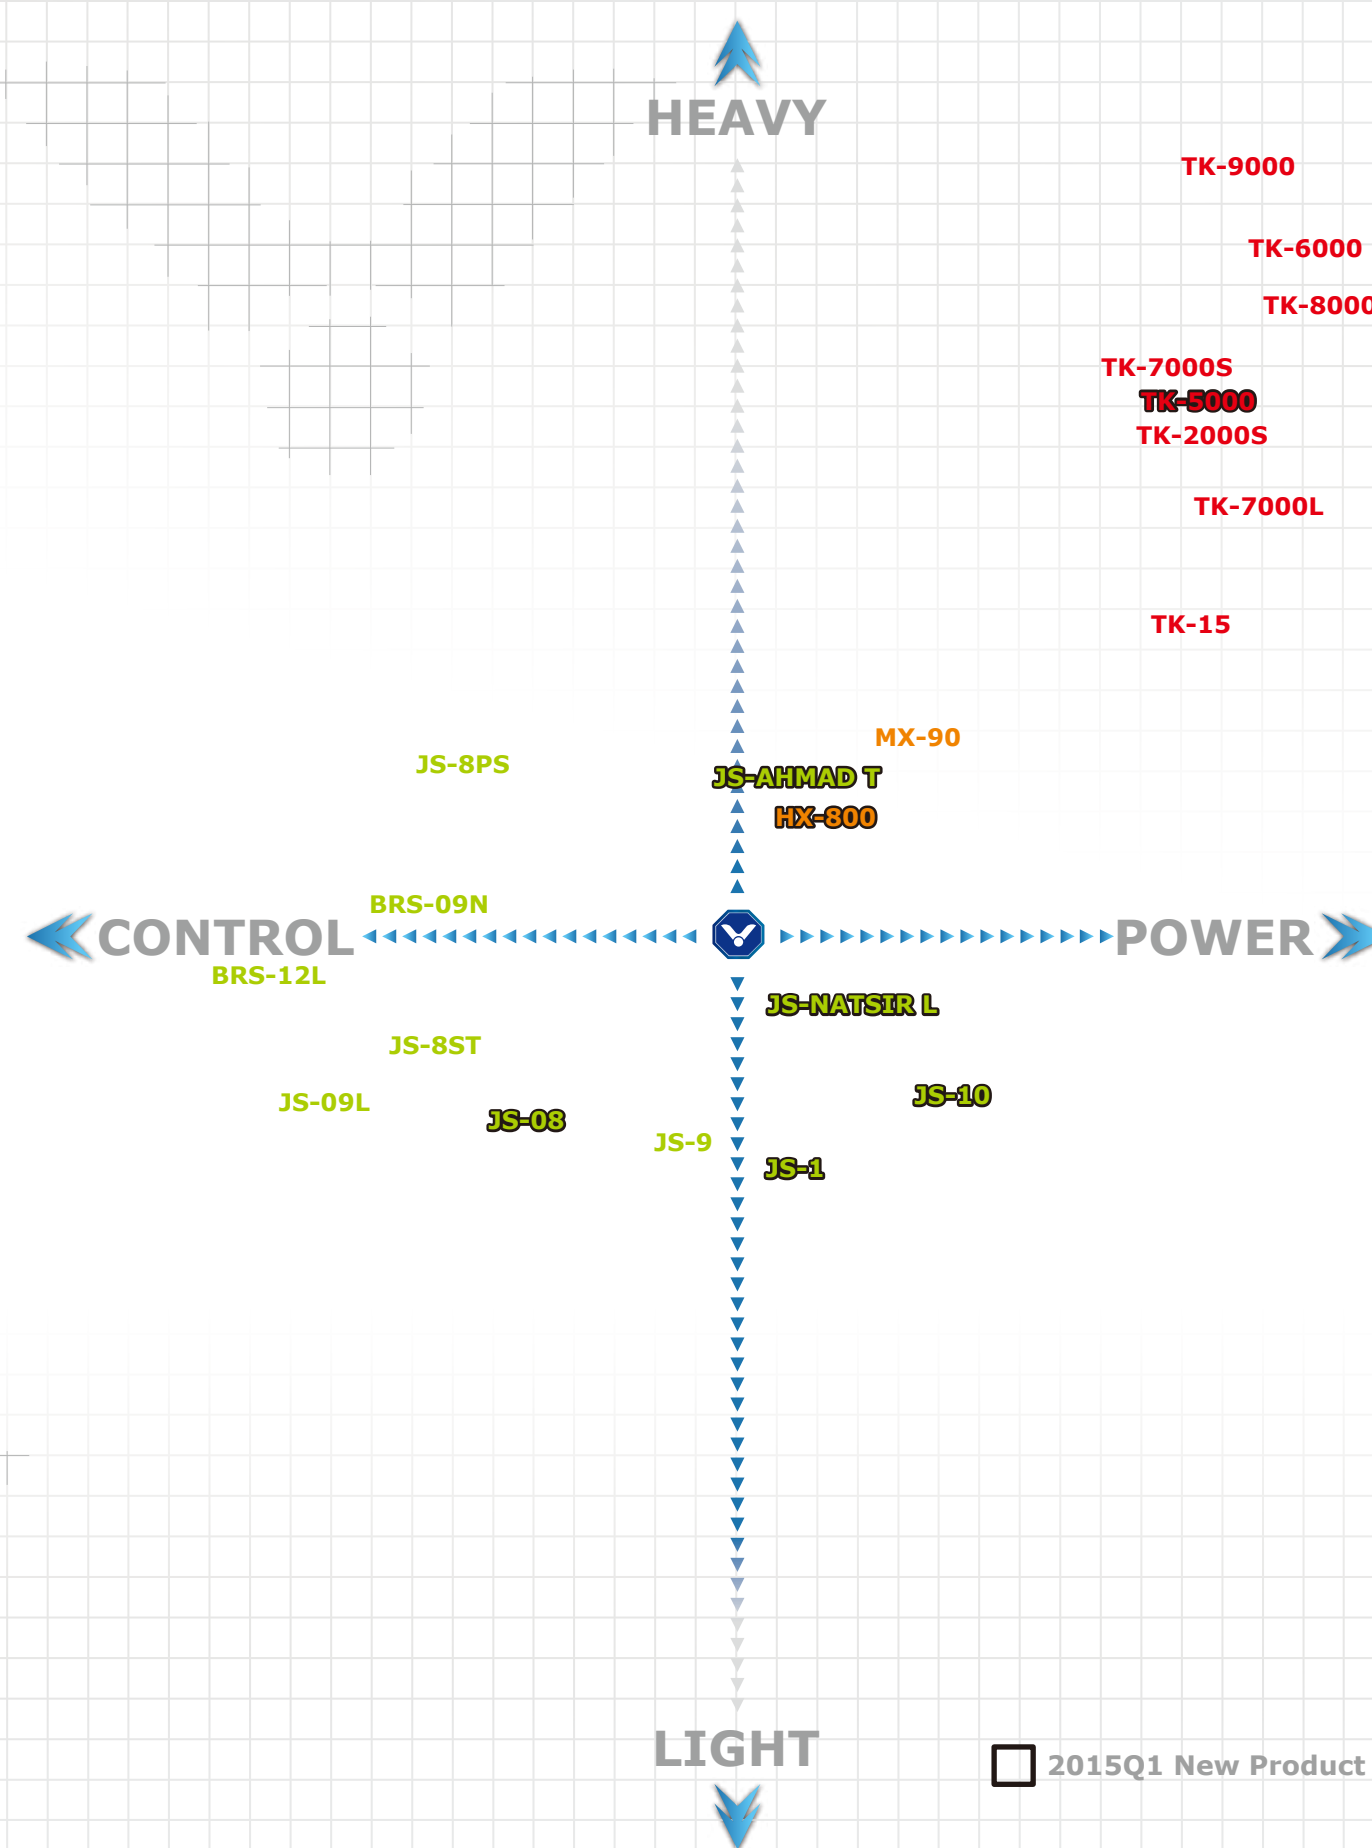

The POWER type racket is rigid and delivers massive power. This type of racket is for the player who seeks for maximum power in their game.

**Series of Represent: THRUSTER K**

### **THRUSTER K**

Attack is the best defense and is the foundation of victory. Combining a frame structure that releases smash power and graphene used frame, it provides solid experience and devastating power, making your smash more powerful.

## RACKET MAPPING

# RACKET TECHNOLOGIES

## MATERIAL ENFORCEMENT

Ultra Carbon Nano Fiber provides crispy and comfortable feel on impact. The result of reduced weight comes without sacrificing the strength and power, while the resilience of nanofiber still maintains excellent control and stability for every hit.

## PYROFIL by Mitsubishi

PYROFIL carbon fiber and its composites, are advanced high-performance materials from Japan. The characteristic of high intensity bonds ultra-light offers racket excellent shock-absorption and enhances control.

NANO FORTIFY is composed by numerous tube-shaped carbon fiber. This technology can optimize high resilience. With bending strength to generate high repulsion, which enhance attacking power on every single hit.

## Zxion®

Liquid Crystalline Polyester fiber originated and created by Japan with interwoven braided layer, quickly absorbs vibration in order to enhance outstanding elasticity and stability during the game.

## MATERIAL ENFORCEMENT

Graphene is composed of carbon atoms arranged densely in a hexagonal honeycomb crystal lattice, which has become one of the lightest and strongest materials in the 21st century. By only one gram of graphene can bear five tons of weight.

Combining with carbon fiber, it fortifies the racket frame and makes the racket get lighter and stronger, which causes a revolution in a way of racket performance.

Breakthrough of manufacturing process, combine two physically contradicted compounds and create a new material with advantages from both.

The reinforced woven carbon fiber technology uses the X shape interweaving to closely weave the layers of carbon fiber, forming a strong powerful network of tense carbon graphite. This adds torsion stability to the racket face and the shaft.

The NANO TEC technology works by evenly distributing nano-sized particles in the vacant space between carbon fiber bundles, this highly increases the overall stiffness of the carbon composite fibers, and reduces the distortion of the frame.

NANO TUBE has increased much bending force compare with conventional graphite. VICTOR imply above feature to offer racket present light & flexible response.

Core shell rubber is used to cover the epoxy resins to build resilience and protection.

Core shell rubber is added into carbon fiber and the foam materials used to fill the frame, which not only increases the extension strength of carbon fiber, but also improves the resilience. The Foamex turns much more compacted during the foaming process, and possesses with better shock absorption once the foaming is done.

## GROMMET SYSTEM

The unique 80-hole stringing pattern is a one-string-per-hole. This creates a perfect square network which allows an even distribution of the string and reduces friction between the horizontal and vertical strings which also reduces re-stringing time.

The single-pass grommet hole construction creates less friction between strings, this effectively reduces tension loss, while extending string life.

## FRAME SECTION

### AERO-DIAMOND

Combining the controllability of "diamond-shape" structure with the stability and smoothness of "sword-shape" structure, AERO-DIAMOND frame minimizes air-resistance and improves handling stability during each game.

### AERO-SWORD

Innovative technology combining the two popular frame structure SWORD and AERODYNAMIC, the AERO-SWORD can efficiently reduce air resistance and allowing a faster and greater hitback.

### SWORD

This diamond-shaped design cuts through the air like sword. It significantly reduces air resistance and provides a faster swing speed.

### DIAMOND

By uniting box and triangular shape design, the diamond-like hexangular-shaped section provides more face stability and improves maneuverability and hitting power.

### OCTABLADE

The OCTABLADE cross-section design combines the shapes of a rhomboid and a hexagonal structure and provides better Racket face stability, reduces air resistance, and improves attacking power and control.

### POWER BOX

The box-shaped design effectively increases the stability and anti-torque, can stand higher string tension.

### AERODYNAMIC

The elliptically-shaped section can decrease the air resistance, provide higher anti-torque, maximize control and vastly increase the speed of returning hit.

## FRAME ENFORCEMENT

### SHARK TEC

SHARK TEC is inspired by the skin of shark. Shark skin's sandpaper-like surface is added to the racket frame to reduce air resistance, which can enable the player with a smoother shot.

### CATAPULT STRUCTURE

CATAPULT STRUCTURE stores power and releases at smashing for maximum effect .

### INNER WAVES

The INNER WAVES technology lengthened the string, with 5% extended sweet spot, significantly reduce shock, provides more maneuverability and face stability.

### PEAK WAVES

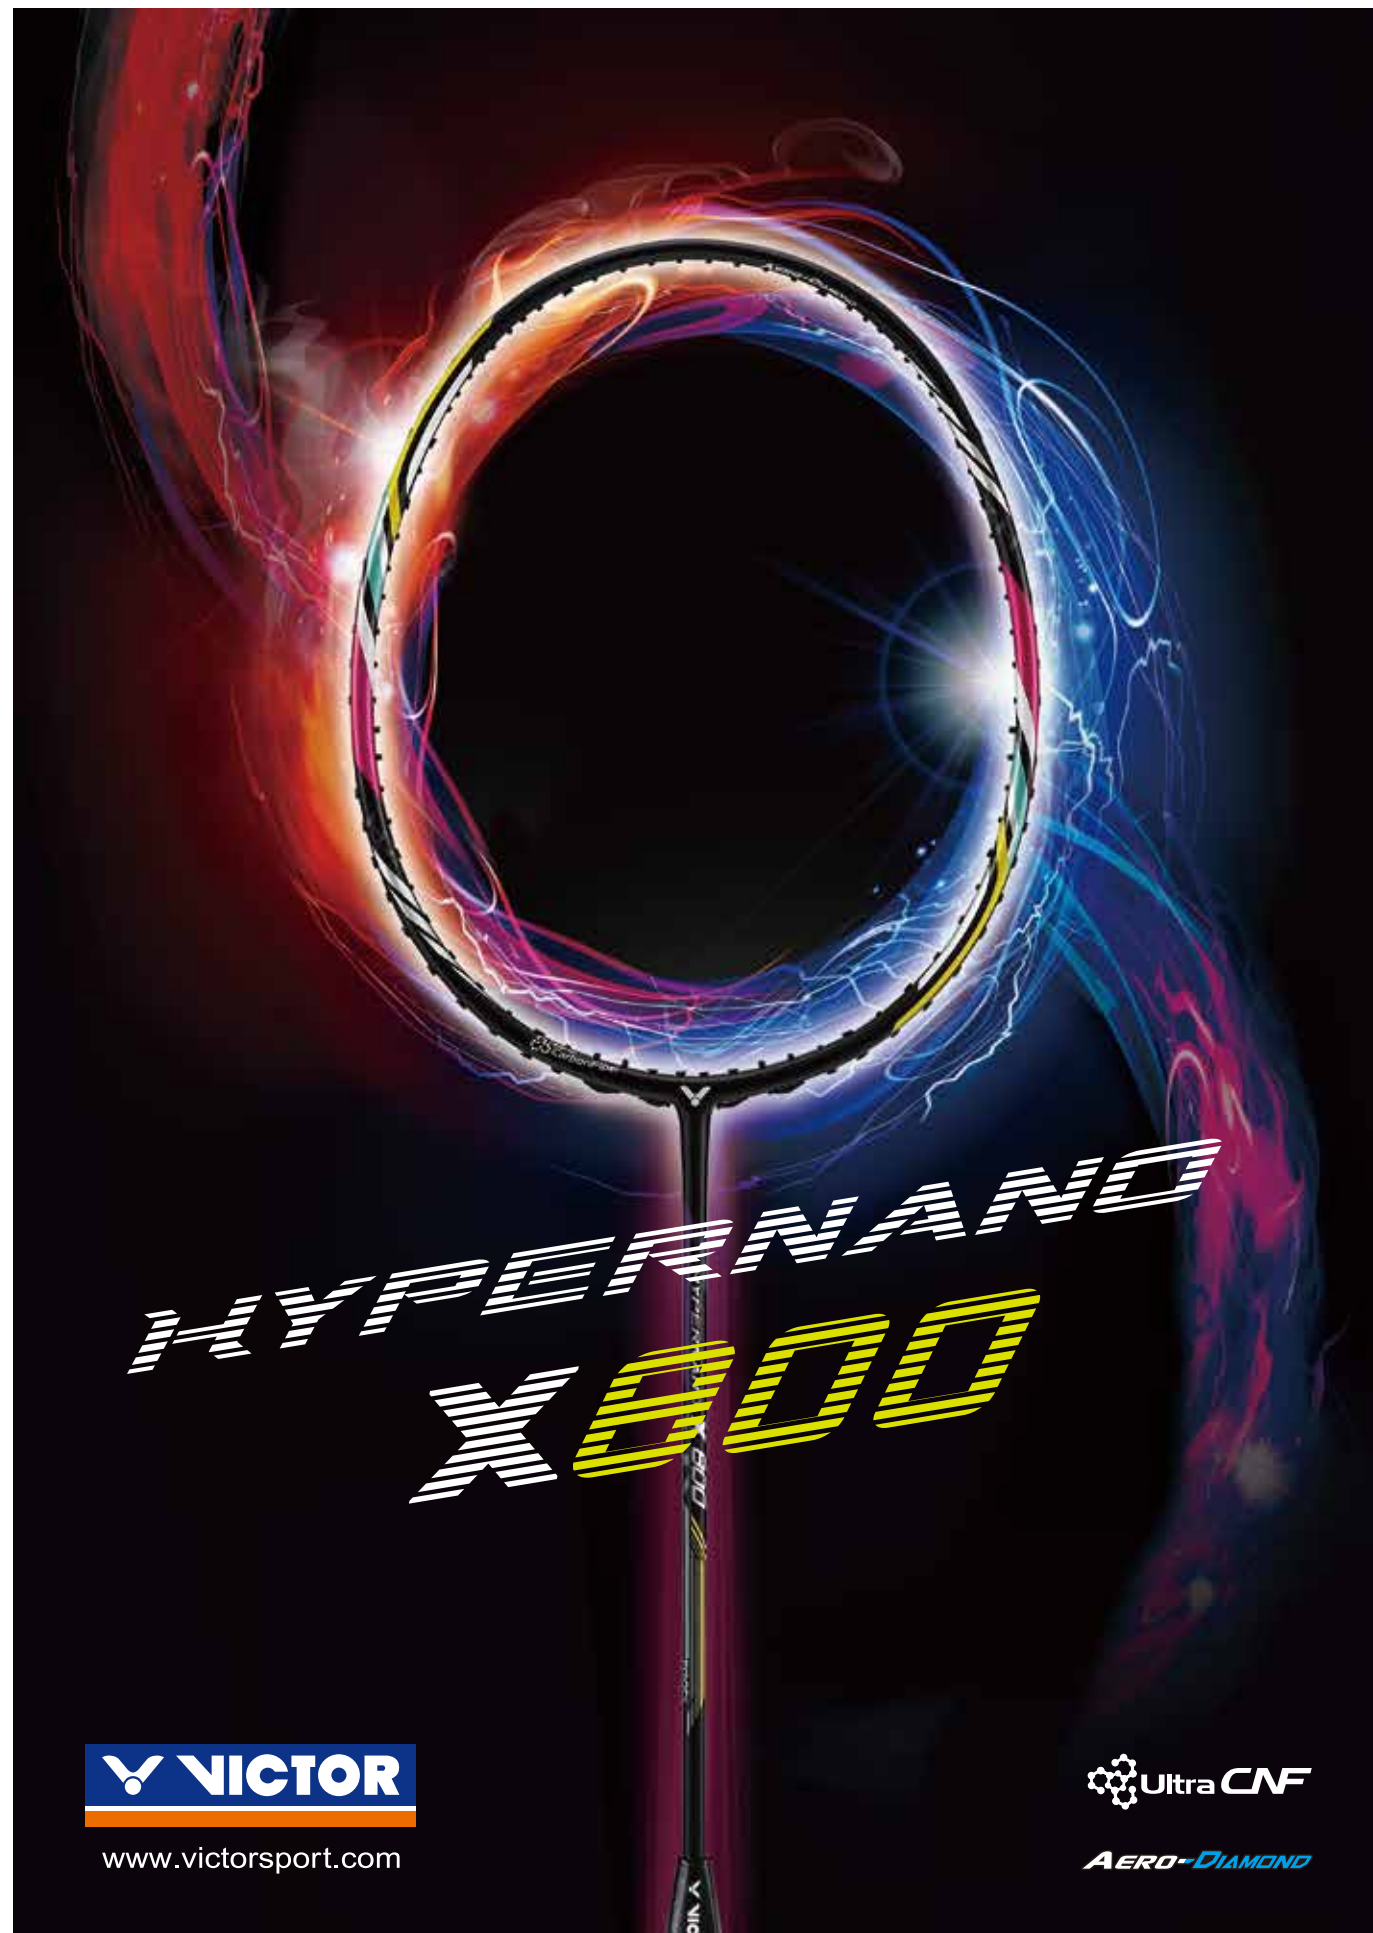

The PEAK WAVES technology and the double interweaving combine to create a vertical string stability system with 7% less string tension loss compared to an ordinary racket. It provides greater face stability and not only increases the fit of the strings, but also reduces wear and tear for better racket durability.

### SHOCKLESS

Special shock absorbing materials are located on 3 and 9 o'clock; significantly reducing the shock of impact.

**HYPERNANO X800**

**VICTOR**  
www.victorsport.com

Ultra **CNF**  
**AERO-DIAMOND**

# HYPERNANO X

HYPERNANO X enables maximal accuracy in smashes and offers great control that allows easy shifting between defense to attack. Powered by AERO-DIAMOND and advanced material technology, HYPERNANO X efficiently attacks and defends with best functionality, at the same time keeping balance and stabilizing anti-torque.

## Ultra **CNF**

Ultra Carbon Nano Fiber provides crispy and comfortable feel on impact. The result of reduced weight comes without sacrificing the strength and power, while the resilience of nanofiber still maintains excellent control and stability for every hit.

## **AERO-DIAMOND**

Combining the controllability of "diamond-shape" structure with the stability and smoothness of "sword-shape" structure, AERO-DIAMOND frame minimizes air-resistance and improves handling stability during each game.

Under careful weight distribution and performance design conducted by VICTOR R&D team, both frame and shaft are optimized to enhance stability and anti-torsion performance, creating excellent force transmission from shaft to frame.

### 36% More Stability

Ultra Carbon Nano Fiber provides crispy and comfortable feel on impact. The result of reduced weight comes without sacrificing the strength and power, while the resilience of nanofiber still maintains excellent control and stability for every hit.

Combining the controllability of "diamond-shape" structure with the stability and smoothness of "sword-shape" structure, AERO-DIAMOND frame minimizes air-resistance and improves handling stability during each game.

### 17% Higher Anti-Torque

PYROFIL carbon fiber and its composites, are advanced high-performance materials from Japan. The characteristic of high intensity bonds ultra-light offers racket excellent shock-absorption and enhances control.

- **REMARK** Made In Taiwan

Engineered with Ultra Carbon Nano Fiber and the AERO-DIAMOND frame provides excellent resilience and anti-torsion performance. This lightweight yet stable racket is perfect for players who are looking for exceptional precision.

# METEOR X

Improved reinforced hitting power and racket frame stability. The METEOR X series uses the OCTABLADE structure combined with CARBON XT reinforced woven carbon fiber technology to not only provide racket frame stability, but also improve effectiveness in reducing air resistance, attacking power, and added antitorque in the shaft. Strung with the EIGHTY-80 mode and the PEAK WAVES to provides greater frame stability and not only increases the fit of the strings, but also reduces wear and tear for better racket durability.

## PEAK WAVES

The PEAK WAVES technology and the double interweaving combine to create a vertical string stability system with 7% less string tension loss compared to an ordinary racket. It provides greater face stability and not only increases the fit of the strings, but also reduces wear and tear for better racket durability.

## OCTABLADE

The OCTABLADE cross-section design combines the shapes of a rhomboid and a hexagonal structure and provides better Racket face stability, reduces air resistance, and improves attacking power and control.

## METEOR X 90

### MX-90

STRINGS

High Resilience

**VS-890  
A/G/O**

► **LENGTH** 10 m  
► **DIAMETER** 0.68 mm  
► **REMARK** Made in Japan

A G O

HARD ☒ With the combination of oval-shaped, double-layer nylon monofilament and special nylon coating technique, VS-890 is gifted with excellent resilience and remarkable ability to instantly rebound the shuttlecock; featuring not only the persistent string tension, but also the improvement of durability.

MEDIUM ☐

SOFT ☐

**VS-650  
A/C/F/G**

► **LENGTH** 10 m  
► **DIAMETER** 0.66 mm  
► **REMARK** Made in Japan

A C F G

HARD ☐ VS-650 has high tenacity multifilament core wrapped with two layers of multi-braided triplet fiber. The string made by dipping technique combined all materials to high performance. VS-650 provides most repulsion power with a sharp touch.

MEDIUM ☐

SOFT ☒

**VS-650 Reel  
A**

► **LENGTH** 200 m  
► **DIAMETER** 0.66 mm  
► **REMARK** Made in Japan

A

HARD ☐ VS-650 has high tenacity multifilament core wrapped with two layers of multi-braided triplet fiber. The string made by dipping technique combined all materials to high performance. VS-650 provides most repulsion power with a sharp touch.

MEDIUM ☐

SOFT ☒

**NS-660Ti  
A/C/F/G/M/Q**

► **LENGTH** 10 m  
► **DIAMETER** 0.66 mm  
► **REMARK** Material from Japan  
Made in Taiwan

A C F G M Q

HARD ☐ NS-660Ti uses 0.66mm super fine high strength fiber from Japan and is joined more tightly to the nylon molecules through nano and titanium technology. These technologies give unprecedented repulsion and enhance crispy clear sound.

MEDIUM ☒

SOFT ☐

Control

**NS-660 Reel  
A/C/F/G**

► **LENGTH** 200 m  
► **DIAMETER** 0.66 mm  
► **REMARK** Material from Japan  
Made in Taiwan

A C F G

HARD ☐ NS-660Ti uses 0.66mm super fine high strength fiber from Japan and is joined more tightly to the nylon molecules through nano and titanium technology. These technologies give unprecedented repulsion and enhance crispy clear sound.

MEDIUM ☒

SOFT ☐

**NS-880ZTi  
A/C/F/G/D/J**

► **LENGTH** 10 m  
► **DIAMETER** 0.68 mm  
► **REMARK** Material from Japan  
Made in Taiwan

ZXION is a trademark of the LCP filament by KB Seiren, Ltd.

A C F G D J

HARD ☒ NS-880ZTi uses new "ZXION" super strong durable fiber from Japan, interwoven braided with the outer layer "high-strength flat fiber," increases strength and extensibility of the strings, provides explosive repulsion with added nano-titanium alloy coating technology, it supports excellent control and an outstanding hitting sound.

MEDIUM ☐

SOFT ☐

Control

**NS-880ZTi Reel

REPLACEMENT GRIPS

- GR112 C Replacement Grip**
- **WIDTH** 25 mm
  - **MATERIAL** Polyurethane
  - **THICKNESS** 1.5 mm
  - **PACKAGE** Single pack
  - **LENGTH** 800 mm

Extra durable design without extra embossing ensures better elasticity.

C

- GR114 C/D Replacement Grip**
- **WIDTH** 25 mm
  - **MATERIAL** Polyurethane
  - **THICKNESS** 1.7 mm
  - **PACKAGE** Single pack
  - **LENGTH** 800 mm

This grip provides tacky and great hitting experience.

C D

- GR113 C/D Replacement Grip**
- **WIDTH** 25 mm
  - **MATERIAL** Polyurethane
  - **THICKNESS** 1.6 mm
  - **PACKAGE** Single pack
  - **LENGTH** 800 mm

The inner EVA strengthens the anti-vibrating effect and provides great hitting experience.

C D

- GR115 C/D Replacement Grip**
- **WIDTH** 25 mm
  - **MATERIAL** Polyurethane
  - **THICKNESS** 1.7 mm
  - **PACKAGE** Single pack
  - **LENGTH** 800 mm

The combination of non-woven fabric and nylon provides great moisture absorbency and excellent anti-slip and comfort.

C D

OVERGRIPS

Moisture Absorbency

- GR233-3 C/D/E/F/I/J Overgrip**
- **WIDTH** 27 mm
  - **MATERIAL** Polyurethane
  - **THICKNESS** 0.6 mm
  - **PACKAGE** 3 in1 pack
  - **LENGTH** 1100 mm
  - **REMARK** Material from Japan / Made in Taiwan

Water absorbing bottom layer combines with anti-slip coating providing great absorbency and skid resistance.

C D E F I J

- GR233 C/D/E/F/I/J Overgrip**
- **WIDTH** 27 mm
  - **MATERIAL** Polyurethane
  - **THICKNESS** 0.6 mm
  - **PACKAGE** Single pack
  - **LENGTH** 1100 mm
  - **REMARK** Material from Japan / Made in Taiwan

Water absorbing bottom layer combines with anti-slip coating providing great absorbency and skid resistance.

C D E F I J

- GR234 C/D/E/F/I/J Overgrip**
- **WIDTH** 27 mm
  - **MATERIAL** Polyurethane+EVA
  - **THICKNESS** 0.6 mm
  - **PACKAGE** Single pack
  - **LENGTH** 1100 mm
  - **REMARK** Material from Japan / Made in Taiwan

The combination of double row perforation and moisture absorbing anti-slip material provides excellent slip resistance and ultra dry feel.The special EVA bottom layer provides superior shock absorption.

C D E F I J

- GR236 C/D/E/F/I/J Overgrip**
- **WIDTH** 27 mm
  - **MATERIAL** Polyurethane
  - **THICKNESS** 0.6 mm
  - **PACKAGE** Single pack
  - **LENGTH** 1100 mm
  - **REMARK** Material from Japan / Made in Taiwan

With moisture absorbing bottom layer combining with anti-slip treated resin and vertical V-shaped surface pattern,the GR-236 provides excellent absorbency and slip resistance.

C D E F I J

- GR252 C/D/E/F/I/J Overgrip**
- **WIDTH** 27 mm
  - **MATERIAL** Polyurethane with Micro-fiber
  - **THICKNESS** 0.6 mm
  - **PACKAGE** Single pack
  - **LENGTH** 1100 mm
  - **REMARK** Material from Japan / Made in Taiwan

The durable micro-fiber material developed by Japan and the diamond-shaped anti-slip pattern on the surface provide outstanding durability and slip-resistant.

C D E F I J

OVERGRIPS

- GR235 C/D/E/F/I/J Overgrip**
- **WIDTH** 27 mm
  - **MATERIAL** Polyurethane
  - **THICKNESS** 0.6 mm
  - **PACKAGE** Single pack
  - **LENGTH** 1100 mm
  - **REMARK** Material from Japan / Made in Taiwan

With moisture absorbing bottom layer combining with anti-slip treated resin and single row perforation, the GR-235 provides excellent absorbency and slip resistance.

C D E F I J

Durability

- GR251 C/D/E/F/I/J Overgrip**
- **WIDTH** 27 mm
  - **MATERIAL** Polyurethane with Micro-fiber
  - **THICKNESS** 0.6 mm
  - **PACKAGE** Single pack
  - **LENGTH** 1100 mm
  - **REMARK** Material from Japan / Made in Taiwan

The durable micro-fiber material developed by Japan provides excellent durability and elastic grip , making it suitable for use by competitive players.

C D E F I J

- GR200 A/C/D/E/F Overgrip**
- **WIDTH** 27 mm
  - **MATERIAL** Polyurethane
  - **THICKNESS** 0.6 mm
  - **PACKAGE** 60 in one pack
  - **LENGTH** 1100 mm
  - **REMARK** Material from Japan / Made in Taiwan

This over grip absorb sweat very well,extremely comfortable,and control skillfully.

A C D E F

OVERGRIPS

Anti-Slip

GR255 C/D/E/F/I/J Overgrip

- WIDTH 27 mm ►MATERIAL Polyurethane
- THICKNESS 0.6 mm ►PACKAGE Single pack
- LENGTH 1100 mm
- REMARK Material from Japan / Made in Taiwan

The ultra-fine moisture absorbent base material developed in Japan and the anti-slip resin treatment on the surface provide a highly slip resistant grip.

C D E F I J

GR256 C/D/E/F/I/J Overgrip

- WIDTH 27 mm ►MATERIAL Polyurethane+EVA
- THICKNESS 0.6 mm ►PACKAGE Single pack
- LENGTH 1100 mm
- REMARK Material from Japan / Made in Taiwan

The ultra-fine anti-slip material developed in Japan on the surface, the V-shaped perforations and shock-absorbent Rubber base material provide excellent perspiration and shock absorption.

C D E F I J

GR262-3 A/C/D/E/I/J/O Overgrip

- WIDTH 27 mm ►MATERIAL Polyurethane
- THICKNESS 0.6 mm ►PACKAGE 3 in 1 pack
- LENGTH 1050 mm
- REMARK Material from Japan

This overgrip is made with a combination of moisture absorbing and anti-slip material. It provides extreme comfort while holding the racket.

A C D E I J O

GR334 C/D/E/F/J Towel Grip (Thin)

- WIDTH 30 mm ►MATERIAL 100% Cotton
- LENGTH 740 mm ►PACKAGE Single pack

The pilable structure absorbs vibration and sweat, providing players a feeling of security and comfort while swinging.

C D E F J

GR337 A/C/D/E/F/J/O Towel Grip (Thick)

- WIDTH 30 mm ►MATERIAL 100% Cotton
- LENGTH 660 mm ►PACKAGE Single pack

The pilable structure absorbs vibration and sweat, providing players a feeling of security and comfort while swinging.

A C D E F J O

GR338 A/C/D/E/F/J/O Towel Grip (Thick)

- WIDTH 30 mm ►MATERIAL 100% Cotton
- LENGTH 10000 mm ►PACKAGE Single roll

The pilable structure absorbs vibration and sweat, providing players a feeling of security and comfort while swinging.
